Anti-Human/Mouse/Rat Phospho-VDR (Ser51) Polyclonal Antibody

多克隆抗体

产品货号: PA01704

第三版

描述: Nuclear hormone receptor. Transcription factor that mediates the action of vitamin D3 by controlling the expression of hormone sensitive genes. Regulates transcription of hormone sensitive genes via its association with the WINAC complex, a chromatin-remodeling complex. Recruited to promoters via its interaction with the WINAC complex subunit BAZ1B/WSTF, which mediates the interaction with acetylated histones, an essential step for VDR-promoter association. Plays a central role in calcium homeostasis.

抗原: Synthesized peptide derived from human VDR around the phosphorylation site of S51.
