Anti-Human/Mouse Phospho-TNS1 (Tyr1326) Polyclonal Antibody

多克隆抗体

产品货号: PA01885

第三版

**描述:**The protein encoded by this gene localizes to focal adhesions, regions of the plasma membrane where the cell attaches to the extracellular matrix. This protein crosslinks actin filaments and contains a Src homology 2 (SH2) domain, which is often found in molecules involved in signal transduction. This protein is a substrate of calpain II. Alternative splicing results in multiple transcript variants encoding different isoforms. TNS1 (Tensin 1) is a Protein Coding gene. Diseases associated with TNS1 include Bannayan-Riley-Ruvalcaba Syndrome and Ruvalcaba Syndrome. Among its related pathways are Focal Adhesion and Integrin Pathway. GO annotations related to this gene include poly(A) RNA binding and actin binding. An important paralog of this gene is TNS3.

**抗原:**Synthesized peptide derived from human Tensin-1 around the phosphorylation site of Tyr1326

**配方:**

**如何使用:**加1ml超纯水重溶

**稳定性:** -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

**稀释液:**PBS (pH7.4) ， 1% BSA

**应用:**WB 1 ~ 5  $\mu$ g/ml.

**特异性:**Ubiquitous.
