Anti-Human APOBEC3G Polyclonal Antibody

多克隆抗体

产品货号: PA12936

第三版

描述:This gene is a member of the cytidine deaminase gene family. It is one of seven related genes or pseudogenes found in a cluster, thought to result from gene duplication, on chromosome 22. Members of the cluster encode proteins that are structurally and functionally related to the C to U RNA-editing cytidine deaminase APOBEC1. It is thought that the proteins may be RNA editing enzymes and have roles in growth or cell cycle control. The protein encoded by this gene has been found to be a specific inhibitor of human immunodeficiency virus-1 (HIV-1) infectivity.

抗原:Recombinant protein of human APOBEC3G

配方:

如何使用:加1ml超纯水重溶

稳定性: -20°C保存条件下,冻干粉,保质期为五年;液体,保质期为两年。

稀释液:PBS (pH7.4) ,1% BSA

**应用**:WB1~5µg/ml.

特异性:Expressed in spleen, testes, ovary and peripheral blood leukocytes and CD4+ lymphocytes. Also expressed in nonpermissive peripheral blood mononuclear cells, and several tumor cell lines; no expression detected in permissive lymphoid and nonlymphoid cell lines.
