ANGPTL3, 243-460aa, Human, His tag, E.coli

产品货号: TP01161

第三版

别名:ANG-5, ANGPT5, ANL3, FHBL2

描述:ANGPTL3 also known as Angiotensin-related protein 3 is a member of the angiotensin-like family of secreted factors. It is expressed predominantly in the liver, and has the characteristic structure of angiotensins, consisting of a signal peptide, N-terminal coiled-coil domain, and the C-terminal fibrinogen (FBN)-like domain. The FBN-like domain in angiotensin-like 3 protein was shown to bind alpha-5/beta-3 integrins, and this binding induced endothelial cell adhesion and migration. This protein may also play a role in the regulation of angiogenesis. Recombinant human ANGPTL3, fused to His-tag at N-terminus, was expressed in E.coli.

配方:Liquid. In 20mM Tris-HCl (pH8.0) containing 10% glycerol

分子量:27.7kDa (239aa)
