第三版

别名:Annexin A5, Anx5, R74653

描述:Anxa5 also known as Annexin A5. Annexin A5, belongs to the annexin family of calcium-dependent phospholipid binding proteins some of which have been implicated in membrane-related events along exocytotic and endocytotic pathways. Anxa5 is a phospholipase A2 and protein kinase C inhibitory protein with calcium channel activity and a potential role in cellular signal transduction, inflammation, growth and differentiation. This protein is an anticoagulant protein that acts as an indirect inhibitor of the thromboplastin-specific complex, which is involved in the blood coagulation cascade. Recombinant mouse Anxa5, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
