别名:ASF1 anti-silencing function 1 homolog B (*S.cerevisiae*), CIA-II.

描述:ASF1B is a member of the H3/H4 family of histone chaperone proteins and is similar to the antisilencing function-1 protein in yeast. This protein is the substrate of the tousel-like kinase family of cell cycleregulated kinases, and may play a key role in modulating the nucleosome structure of chromatin by ensuring a constant supply of histones at sites of nucleosome assembly.
