CD14, 20- 349aa, Human, His tag, E.coli

产品货号: TP01478

第三版

别名:monocyte differentiation antigen CD14, Myeloid cell-specific leucine-rich glycoprotein

描述:CD14 is a surface antigen that is preferentially expressed on monocytes/macrophages. It cooperates with other proteins to mediate the innate immune response to bacterial lipopolysaccharide. Alternative splicing results in multiple transcript variants encoding the same protein. Recombinant human CD14 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
