

Rheb (R165) Anti-Human Rabbit IgG Affinity Purify

Polyclonal Antibody

Cat.NO.: PA01328

3th Edition

Description: Rheb (ras homolog enriched in brain) is a 20 kDa protein identified as a Ras homolog expressed in the rat hippocampus, but it widely exists in a variety of cells. It is also reported that GTP-binding form is predominant in Rheb, unlike other low molecular weight GTP-binding proteins.

Antigen: Synthetic peptide of the C-terminal part of Human Rheb (LEAEKMDGAASQGKSS)

Form: Lyophilized product from 1% BSA in PBS containing 0.05% NaN₃

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
