

Anti-Human/Mouse/Rat Phospho-PRAG1 (Tyr413) Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA01623

3th Edition

Description: This gene encodes an enzyme that belongs to the tyrosine protein kinase family. A similar protein in rat binds to Rho family GTPase 2 (Rnd2) and regulates neurite outgrowth via activation of Ras homolog gene family, member A (RhoA). PRAG1 (PEAK1 Related Kinase Activating Pseudokinase 1) is a Protein Coding gene. An important paralog of this gene is PEAK1.

Antigen: Synthesized peptide derived from human Pragmin around the phosphorylation site of Y413.

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
