

Anti-Human/Mouse CIDEB Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA02810

3th Edition

Description: This protein can activate apoptosis. It is inhibited by DFFB and interacts with DFFA and DFFB. It has high levels of expression in liver and small intestine, and has lower levels of expression in colon, kidney and spleen. CideB specifically interacts with VLDL structural protein, apolipoprotein B100 (apoB100), but not with albumin, a PTG cargo protein. It can interact with COPII components, Sar1 and Sec24.

Antigen: Synthesized peptide derived from the Internal region of human CIDE-B

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Highly expressed in liver and small intestine and, at lower levels, in colon, kidney and spleen.
