

**ASB13, 1-278aa, Human, His tag, E.coli**

**Cat.NO.: TP01241**

3th Edition

**Synonyms:**ankyrin repeat and SOCS box containing 13, FLJ13134, MGC19879

**Description:**ASB13 is a member of the ankyrin repeat and SOCS box-containing (ASB) family of proteins. They contain ankyrin repeat sequence and a SOCS box domain. The SOCS box serves to couple suppressor of cytokine signalling (SOCS) proteins and their binding partners with the elongin B and C complex, possibly targeting them for degradation. Multiple alternatively spliced transcript variants, both protein-coding and not protein-coding, have been described for this gene. Recombinant human ASB13 protein, fused to His-tag at N-terminus, was expressed in E.coli.
