3th Edition

Synonyms:Calcium-binding protein p22, SLC9A1BP, Calcineurin B homolog, Calcineurin homologous protein

Description:CHP (Calcium-binding protein P22) is a phosphoprotein that binds to the sodium-hydrogen exchangers (NHEs). This protein serves as an essential cofactor which supports the physiological activity of NHE family members. It has protein sequence similarity to calcineurin B and it is also known to be an endogenous inhibitor of calcineurin activity.
