

CKS2, 1-79aa, Human, T7-tagged, Recombinant, E.coli

Cat.NO.: TP01634

3th Edition

Synonyms: CDC28 Protein kinase 2, CKSHS2

Description: CKS2, also known as CDC28 Protein kinase 2 associates with the catalytic subunit of cyclindependent kinases and has therefore been assumed to play a direct role in cell cycle regulation. The function of CKS2 in somatic mammalian cells is not well understood although it is required for the first metaphase/anaphase transition during the meiosis.
