

**DENR, 1-198aa, Human, His tag, E.coli**

**Cat.NO.: TP01862**

3th Edition

**Synonyms:**Density-regulated protein, DRP, DRP1, SMAP-3.

**Description:**DENR may be involved in the translation of target mRNAs by scanning and recognition of the initiation codon. This protein plays a role in the modulation of the translational profile of a subset of cancer-related mRNAs when recruited to the translational initiation complex by the oncogene MCTS1. Recombinant human DENR protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.

**Molecular Weight:**24.3 kDa (218aa), confirmed by MALDI-TOF
