

Recombinant Mouse Nectin-2 Protein (His Tag)**Cat.NO.: TP07767**

3th Edition

Synonyms: AI325026 Protein, Mouse; AI987993 Protein, Mouse; Cd112 Protein, Mouse; MPH Protein, Mouse; nectin-2 Protein, Mouse; Pvr Protein, Mouse; Pvs Protein, Mouse

Description: Cluster of Differentiation 112 (CD112), also known as poliovirus receptor related protein 2 (PVRL2 or PRR2), is a single-pass type I transmembrane glycoprotein belonging to the Immunoglobulin superfamily. CD112 protein also serves as an entry for certain mutant strains of herpes simplex virus and pseudorabies virus, and thus is involved in cell to cell spreading of these viruses. CD112 protein has been identified as the ligand for DNAM-1 (CD226), and the interaction of CD226/CD112 protein can induce NK cell- and CD8+ T cell-mediated cytotoxicity and cytokine secretion. CD112 has been regarded as a critical component in allergic reactions, and accordingly may function as a novel target for anti-allergic therapy.

Form: PBS

Molecular Weight: 36 kDa

Sequences: Met 1-Gly 351

Purity: > 95% by HPLC

Concentration:

Endotoxin Level: <1.0 EU per 1 ug of protein (determined by LAL method)

Storage: Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.
