CBR3 Antibody (Clone AT7E8)

单克隆抗体

产品货号: MA01146

第三版

免疫原: Recombinant human CBR3 (1-277aa) purified from E. coli

亚型: IgG1, k

克隆: Anti-human CBR3 mAb, clone AT7E8, is derived from hybridization of mouse F0 myeloma cells with spleen cells from BALB/c mice immunized with a recombinant human CBR3 protein.

描述: Carbonyl reductase 3 (CBR3) is one of several monomeric NADPH-dependent oxidoreductases. This protein catalyzes the reduction of a large number of biologically and pharmacologically active carbonyl compounds to their corresponding alcohols. It also contains three exons spanning 11.2 kilobases and is closely linked to another carbonyl reductase gene - CBR1. Some studies suggest that it mediates 9-cis-retinoic acid-induced cytostasis and is a potential prognostic marker for oral malignancy.
