CKB Antibody (Clone AT8E4)

单克隆抗体

产品货号: MA01182

第三版

免疫原: Recombinant human CKB (1-381aa) purified from E. coli

亚型: Mouse IgG2a, k

克隆: Anti-human CKB mAb, clone AT8E4, is derived from hybridization of mouse F0 myeloma cells with spleen cells from BALB/c mice immunized with a recombinant human CKB protein.

描述: CKB (Creatine kinase B-type) is a cytoplasmic enzyme involved in energy homeostasis. The protein reversibly catalyzes the transfer of phosphate between ATP and various phosphogens such as creatine phosphate. It acts as a homodimer in brain as well as in other tissues, and as a heterodimer with a similar muscle isozyme in heart. Creatine kinases provide the energy of phosphate hydrolysis necessary to drive the normal function of many cellular systems including muscle, tumor and cancer cells.
