COMMD7 Antibody (Clone AT49B5)

单克隆抗体

产品货号: MA01189

第三版

免疫原: Recombinant human COMMD7(1-200aa) purified from E. coli

亚型: Mouse IgG3, k

克隆: Anti-human COMMD7 mAb, clone AT49B5, is derived from hybridization of mouse F0 myeloma cells with spleen cells from BALB/c mice immunized with a recombinant human COMMD7 protein.

描述: COMMD family members are a group of evolutionary conserved proteins that share a common COMM domain at the extreme C-terminus, which provides an interface for protein-protein interactions. COMMD proteins may also play a role in the function of epithelial sodium channels, cell proliferation, and copper homeostasis and in the regulation of the ubiquitin pathway. With highest expression in lung, COMMD7 (COMM domain-containing protein 7) is a 200 amino acid protein that binds COMMD1 via its COMM domain.
