KRT20 Antibody (Clone AT10D8)

单克隆抗体

产品货号: MA01470

第三版

免疫原:Recombinant human KRT20 (1-424aa) purified from E.coli.

亚型:Mouse IgG2a, k

克隆:AT10D8

描述:Keratin 20 is a type I cytokeratin. It is a major cellular protein of mature enterocytes and goblet cells and is specifically found in the gastric and intestinal mucosa. In immunohistochemistry, antibodies to KRT20 can be used to identify a range of adenocarcinoma arising from epithelia that normally contain the KRT20 protein. For example, the protein is commonly found in colorectal cancer, transitional cell carcinomas and in Merkel cell carcinoma, but is absent in lung cancer, prostate cancer, and nonmucinous ovarian cancer. It is often used in combination with antibodies to CK7 to distinguish different types of glandular tumor.

配方:Liquid. In Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% Glycerol.

浓度:1 mg/ml

+4°C保存(1-2周).长期保存在-20°C或者-70°C.避免反复冻融.

应用:ELISA, WB, ICC/IF
