SGCD Antibody (Clone AT19G8)

单克隆抗体

产品货号: MA01578

第三版

免疫原: Recombinant human SGCD (57-289aa) purified from E. coli

亚型: IgG1b,k

克隆: Anti-human SGCD mAb, clone AT19G8, is derived from hybridization of mouse F0 myeloma cells with spleen cells from BALB/c mice immunized with a recombinant human SGCD protein.

描述: SGCD is one of the four known components of the sarcoglycan complex, which is a subcomplex of the dystrophin-glycoprotein complex (DGC). DGC forms a link between the F-actin cytoskeleton and the extracellular matrix. It is expressed most abundantly in skeletal and cardiac muscle. Mutations in this gene have been associated with autosomal recessive limb-girdle muscular dystrophy and dilated cardiomyopathy. Alternatively spliced transcript variants encoding distinct isoforms have been observed for this gene.
