Anti-Poly (ADP-ribose) (10H) Mouse IgG MoAb

单克隆抗体

产品货号: MA01707

第三版

免疫原:Purified Poly (ADP-ribose)

亚型:IgG3,

克隆:10H

描述:The poly ADP-ribosylation is one of post translational modification of proteins, and is the addition of many ADP-ribose moieties to a protein. This protein modification is carried out by the poly ADP-ribose polymerases (PARPs), which are found in most eukaryotes, but not prokaryotes or yeast. The reaction is involved in various cellular processes and conditions, including DNA repair, transcriptional control, genomic stability, cell death and transformation, and several reports have been indicated in relation to cancer and autoimmune disease (ref. 1-4). This antibody reacts specifically to poly ADP-ribose (PAR) (ref. 4, 5).

配方:Lyophilized product from PBS containing 1 % BSA and 0.05 % NaN₃

浓度:Please see datasheet.

保存: +4 ° C 保存 (1-2 周). 长期保存在-20 ° C或者-70 ° C. 避免反复冻融.

应用:ELISA, WB, ICC/IF
