Anti-Human/Mouse/Rat CASP9 Monoclonal Antibody

单克隆抗体

产品货号: MA01886

第三版

免疫原:Fusion protein of Caspase 9/p35/p10

亚型:IgG2b

克隆:34

描述:Caspase 9,apoptosis-related cysteine protease (CASP9,synonyms: MCH6,APAF3,APAF-3,ICE-LAP6,CASPASE-9c)is a member of the cysteine-aspartic acid protease (caspase) family. Sequential activation of caspases plays a central role in the execution-phase of cell apoptosis. Caspases exist as inactive proenzymes which undergo proteolytic processing at conserved aspartic residues to produce 2 subunits,large and small,that dimerize to form the active enzyme. Caspase 9 is processed by caspase APAF1; this step is thought to be one of the earliest in the caspase activation cascade.

配方:

浓度:None

保存: +4 ° C 保存 (1-2 周). 长期保存在-20 ° C或者-70 ° C. 避免反复冻融.

应用:ELISA, WB, ICC/IF
