Anti-Human/Mouse/Rat CKM Monoclonal Antibody

单克隆抗体

产品货号: MA01932

第三版

免疫原:Synthetic Peptide

亚型:IgG2a

克隆:273

描述:CKM,also named as CKMM and M-CK,is a member of the ATP:guanido phosphotransferase protein family. It is a cytoplasmic enzyme involved in energy homeostasis and is an important serum marker for myocardial infarction. CKM reversibly catalyzes the transfer of phosphate between ATP and various phosphogens such as creatine phosphate. It acts as a homodimer in striated muscle as well as in other tissues,and as a heterodimer with a similar brain isozyme in heart. CK isoenzymes play a central role in energy transduction in tissues with large,fluctuating energy demands,such as skeletal muscle,heart,brain and spermatozoa. CK MB consists of a dimer of nonidentical chains. With MM being the major form in skeletal muscle and myocardium,MB existing in myocardium,and BB existing in many tissues,especially brain.

配方:

浓度:None

保存: +4 ° C 保存 (1-2 周). 长期保存在-20 ° C或者-70 ° C. 避免反复冻融.

应用:ELISA, WB, ICC/IF
