Anti-Human/Rat PHB Monoclonal Antibody

单克隆抗体

产品货号: MA02098

第三版

免疫原:Fusion protein of Prohibitin

亚型:IgG1

克隆:73

描述:Prohibitin,also known as PHB,a member of the Band-7 family of proteins,is widely distributed in bacteria, plants, yeast, protozoa and mammals and is important in cell proliferation, differentiation and apoptosis. This protein localizes to the inner membrane of mitochondria, where it acts as a chaperone protein, and is also found in the nucleus, where it negatively regulates transcription. Recent study confirmed that the expression and distribution of PHB, which is a nuclear matrix protein, affect the apoptosis of HaCaT cells and its co-localization with specific gene products connected with cell apoptosis.

配方:

浓度:None

+4°C 保存 (1-2周). 长期保存在-20°C或者-70°C. 避免反复冻融.

应用:ELISA, WB, ICC/IF

1/1
