Anti-Human/Mouse/Rat RPL3 Monoclonal Antibody

单克隆抗体

产品货号: MA02114

第三版

免疫原:Fusion protein of RPL3

亚型:IgG1

克隆:430

描述:Ribosomes,the complexes that catalyze protein synthesis,consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. RPL3,also named as TARBP-B and MGC104284,belongs to the ribosomal protein L3P family. This protein is a component of the 60S subunit. It can bind to the HIV-1 TAR mRNA,and it has been suggested that the protein contributes to tat-mediated transactivation. As is typical for genes encoding ribosomal proteins,there are multiple processed pseudogenes of this gene dispersed through the genome.

配方:

浓度:None

保存: +4 ° C 保存 (1-2 周). 长期保存在-20 ° C或者-70 ° C. 避免反复冻融.

应用:ELISA, WB, ICC/IF
