Anti-Human/Mouse/Rat HSPA8 Monoclonal Antibody

单克隆抗体

产品货号: MA02654

第三版

免疫原: Synthesized peptide derived from the Internal region of human HSC 70.

亚型: IgG

克隆:

描述: This gene encodes a member of the heat shock protein 70 family, which contains both heat-inducible and constitutively expressed members. This protein belongs to the latter group, which are also referred to as heat-shock cognate proteins. It functions as a chaperone, and binds to nascent polypeptides to facilitate correct folding. It also functions as an ATPase in the disassembly of clathrin-coated vesicles during transport of membrane components through the cell. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

配方:

浓度: 1mg/mL

保存: +4 ° C 保存 (1-2 周). 长期保存在-20 ° C 或者-70 ° C. 避免反复冻融.

应用: ELISA, WB, ICC/IF
