IRF-3 (S386 Phosphorylated) Anti-Human Rabbit IgG Affinity Purify

多克隆抗体

产品货号: PA01265

第三版

描述:Regulatory transcription factor IRF-3 plays a critical role in the regulation of innate immune responses, especially production of IFN- α / β , against viral and bacterial infections. IRF-3 is ubiquitously expressed in its inactive form in the cytoplasm. Viral infection induces phosphorylation of the Ser 386 in IRF-3 by IRF-3 kinase (IKK-i/ γ , TBK-1). This phosphorylation induces dimerization of IRF-3 and association with the coactivators CBP/p300, and the complex activates the target genes in the nucleus.

抗原:Synthetic peptide of the Phosphorylated C-terminal part of human IRF-3 (RVGGAS(pS)LEN)

配方:Lyophilized product from 1 % BSA in PBS containing 0.05% NaN₃

如何使用:加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液:PBS (pH7.4)，1% BSA

应用:WB 1 ~ 5 μ g/ml.

特异性:
