Anti-Human Phospho-ERBIN (Tyr1104) Polyclonal Antibody

多克隆抗体

产品货号: PA01552

第三版

**描述:** This gene is a member of the leucine-rich repeat and PDZ domain (LAP) family. The encoded protein contains 17 leucine-rich repeats and one PDZ domain. It binds to the unphosphorylated form of the ERBB2 protein and regulates ERBB2 function and localization. It has also been shown to affect the Ras signaling pathway by disrupting Ras-Raf interaction. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. ERBIN (ErbB2 Interacting Protein) is a Protein Coding gene. Diseases associated with ERBIN include Congenital Muscular Dystrophy Due To Lmna Mutation. Among its related pathways are NLR Proteins and Signaling by GPCR. An important paralog of this gene is LRRC7.

**抗原:** Synthesized peptide derived from human Erbin around the phosphorylation site of Tyr1104

**配方:**

**如何使用:** 加1ml超纯水重溶

**稳定性:** -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

**稀释液:** PBS (pH7.4) ， 1% BSA

**应用:** WB 1 ~ 5 μg/ml.

**特异性:** Highly expressed in brain, heart, kidney, muscle and stomach, followed by liver, spleen and intestine.
