Anti-Human/Mouse Phospho-EPB41 (Tyr660) Polyclonal Antibody

多克隆抗体

产品货号: PA01711

第三版

描述:The protein encoded by this gene, together with spectrin and actin, constitute the red cell membrane cytoskeletal network. This complex plays a critical role in erythrocyte shape and deformability. Mutations in this gene are associated with type 1 elliptocytosis (EL1). Alternatively spliced transcript variants encoding different isoforms have been described for this gene. EPB41 (Erythrocyte Membrane Protein Band 4.1) is a Protein Coding gene. Diseases associated with EPB41 include Elliptocytosis-1 and Hereditary Elliptocytosis. Among its related pathways are Protein-protein interactions at synapses and Sertoli-Sertoli Cell Junction Dynamics. GO annotations related to this gene include actin binding and calmodulin binding. An important paralog of this gene is EPB41L2.

抗原:Synthesized peptide derived from human 4.1R around the phosphorylation site of Tyr660

配方:

如何使用:加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液:PBS (pH7.4) ， 1% BSA

应用:WB 1 ~ 5 μg/ml.

特异性:
