Anti-Human/Mouse/Rat Phospho-MEF2A (Ser408) Polyclonal Antibody

多克隆抗体

产品货号: PA01853

第三版

描述: Transcriptional activator which binds specifically to the MEF2 element, 5'-YTA[AT](4)TAR-3', found in numerous muscle-specific genes. Also involved in the activation of numerous growth factor- and stress-induced genes. Mediates cellular functions not only in skeletal and cardiac muscle development, but also in neuronal differentiation and survival. Plays diverse roles in the control of cell growth, survival and apoptosis via p38 MAPK signaling in muscle-specific and/or growth factor-related transcription. In cerebellar granule neurons, phosphorylated and sumoylated MEF2A represses transcription of NUR77 promoting synaptic differentiation.

抗原: Synthesized peptide derived from human MEF-2 around the phosphorylation site of Ser408

配方:

如何使用: 加1ml超纯水重溶
