Anti-Human/Mouse ATPAF2 Polyclonal Antibody

多克隆抗体

产品货号: PA02203

第三版

描述: This gene encodes an assembly factor for the F(1) component of the mitochondrial ATP synthase. This protein binds specifically to the F1 alpha subunit and is thought to prevent this subunit from forming nonproductive homooligomers during enzyme assembly. This gene is located within the Smith-Magenis syndrome region on chromosome 17. An alternatively spliced transcript variant has been described, but its biological validity has not been determined. ATPAF2 (ATP Synthase Mitochondrial F1 Complex Assembly Factor 2) is a Protein Coding gene. Diseases associated with ATPAF2 include Mitochondrial Complex V Deficiency, Nuclear Type 1 and Isolated Atp Synthase Deficiency.

抗原: Synthesized peptide derived from the Internal region of human ATPAF2

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) , 1% BSA

应用: WB 1 ~ 5 μ g/ml.

特异性: Widely expressed.
