Anti-Human/Mouse/Rat PRDX1 Polyclonal Antibody

多克隆抗体

产品货号: PA02523

第三版

描述:Involved in redox regulation of the cell. Reduces peroxides with reducing equivalents provided through the thioredoxin system but not from glutaredoxin. May play an important role in eliminating peroxides generated during metabolism. Might participate in the signaling cascades of growth factors and tumor necrosis factor-alpha by regulating the intracellular concentrations of H₂O₂. Reduces an intramolecular disulfide bond in GDPD5 that gates the ability to GDPD5 to drive postmitotic motor neuron differentiation.

抗原:Synthesized peptide derived from the Internal region of human PRX I.
