Anti-Human CSF3R Polyclonal Antibody

多克隆抗体

产品货号: PA02661

第三版

描述:The protein encoded by this gene is the receptor for colony stimulating factor 3, a cytokine that controls the production, differentiation, and function of granulocytes. The encoded protein, which is a member of the family of cytokine receptors, may also function in some cell surface adhesion or recognition processes. Alternatively spliced transcript variants have been described. Mutations in this gene are a cause of Kostmann syndrome, also known as severe congenital neutropenia.

抗原:Synthesized peptide derived from the Internal region of human G-CSFR.

配方:
