Anti-Human/Mouse CEP135 Polyclonal Antibody

多克隆抗体

产品货号: PA02669

第三版

描述: This gene encodes a centrosomal protein, which acts as a scaffolding protein during early centriole biogenesis, and is also required for centriole-centriole cohesion during interphase. Mutations in this gene are associated with autosomal recessive primary microcephaly-8. CEP135 (Centrosomal Protein 135) is a Protein Coding gene. Diseases associated with CEP135 include Microcephaly 8, Primary, Autosomal Recessive and Autosomal Recessive Primary Microcephaly. Among its related pathways are Regulation of PLK1 Activity at G2/M Transition and Organelle biogenesis and maintenance. GO annotations related to this gene include microtubule binding and protein C-terminus binding. An important paralog of this gene is TSGA10.

抗原: Synthesized peptide derived from the C-terminal region of human CEP135

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μ g/ml.

特异性:
