Anti-Human/Mouse/Rat CLIC4 Polyclonal Antibody

多克隆抗体

产品货号: PA02871

第三版

描述: Chloride channels are a diverse group of proteins that regulate fundamental cellular processes including stabilization of cell membrane potential, transepithelial transport, maintenance of intracellular pH, and regulation of cell volume. Chloride intracellular channel 4 (CLIC4) protein, encoded by the CLIC4 gene, is a member of the p64 family; the gene is expressed in many tissues and exhibits a intracellular vesicular pattern in Panc-1 cells (pancreatic cancer cells).

抗原: Synthesized peptide derived from the N-terminal region of human CLIC4
