Anti-Human/Mouse/Rat CLIP1 Polyclonal Antibody

多克隆抗体

产品货号: PA02875

第三版

描述:The protein encoded by this gene links endocytic vesicles to microtubules. This gene is highly expressed in Reed-Sternberg cells of Hodgkin disease. Several transcript variants encoding different isoforms have been found for this gene. Binds to the plus end of microtubules and regulates the dynamics of the microtubule cytoskeleton. Promotes microtubule growth and microtubule bundling. Links cytoplasmic vesicles to microtubules and thereby plays an important role in intracellular vesicle trafficking. Plays a role macropinocytosis and endosome trafficking.

抗原:Synthesized peptide derived from the C-terminal region of human CLIP-170
