Anti-Human/Mouse/Rat EGR1/2 Polyclonal Antibody

多克隆抗体

产品货号: PA03694

第三版

描述:The protein encoded by this gene is a transcription factor with three tandem C2H2-type zinc fingers. Defects in this gene are associated with Charcot-Marie-Tooth disease type 1D (CMT1D), Charcot-Marie-Tooth disease type 4E (CMT4E), and with Dejerine-Sottas syndrome (DSS). Multiple transcript variants encoding two different isoforms have been found for this gene. EGR2 (Early Growth Response 2) is a Protein Coding gene. Diseases associated with EGR2 include Neuropathy, Congenital Hypomyelinating and Charcot-Marie-Tooth Disease, Type 1D. Among its related pathways are Toll-like Receptor Signaling Pathway and HTLV-I infection. GO annotations related to this gene include transcription factor activity, sequence-specific DNA binding and ligase activity. An important paralog of this gene is EGR3.

抗原:Synthesized peptide derived from the C-terminal region of human Egr-2

配方:

如何使用:加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液:PBS (pH7.4) ， 1% BSA

应用:WB 1 ~ 5 μg/ml.

特异性:Detected in neutrophils (at protein level)
