Anti-Human/Mouse/Rat ELK1 Polyclonal Antibody

多克隆抗体

产品货号: PA03728

第三版

描述: This gene is a member of the Ets family of transcription factors and of the ternary complex factor (TCF) subfamily. Proteins of the TCF subfamily form a ternary complex by binding to the the serum response factor and the serum response element in the promoter of the c-fos proto-oncogene. The protein encoded by this gene is a nuclear target for the ras-raf-MAPK signaling cascade. This gene produces multiple isoforms by using alternative translational start codons and by alternative splicing. Related pseudogenes have been identified on chromosomes 7 and 14.

抗原: Synthesized peptide derived from human Elk-1 around the non-phosphorylation site of Ser389.
