Anti-Human ELOA3 Polyclonal Antibody

多克隆抗体

产品货号: PA03732

第三版

描述:The SIII (or elongin) transcription elongation factor complex stimulates the rate of transcription elongation by RNA polymerase II by suppressing the transient pausing of the polymerase at many sites along the DNA template. This complex is a heterotrimer, composed of the transcriptionally active subunit A, A2 or A3 (or elongin A, A2 or A3) and two regulatory subunits, B and C (or elongin B and C). This gene encodes subunit A3. A3 and A are ubiquitously expressed, whereas A2 is specifically expressed in the testis. ELOA3 (Elongin A3) is a Protein Coding gene. Among its related pathways are HIV Life Cycle and Formation of HIV elongation complex in the absence of HIV Tat. An important paralog of this gene is ELOA3B.

抗原:Synthesized peptide derived from the C-terminal region of human Elongin A3

配方:

如何使用:加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液:PBS (pH7.4) ， 1% BSA

应用:WB 1 ~ 5 μ g/ml.

特异性:Widely expressed.
