Anti-Human/Mouse/Rat MAEA Polyclonal Antibody

多克隆抗体

产品货号: PA03741

第三版

**描述:** This gene encodes a protein that mediates the attachment of erythroblasts to macrophages. This attachment promotes terminal maturation and enucleation of erythroblasts, presumably by suppressing apoptosis. The encoded protein is an integral membrane protein with the N-terminus on the extracellular side and the C-terminus on the cytoplasmic side of the cell. Alternative splicing results in multiple transcript variants. MAEA (Macrophage Erythroblast Attacher) is a Protein Coding gene. Diseases associated with MAEA include Epiglottis Neoplasm and Chronic Frontal Sinusitis. GO annotations related to this gene include actin binding.

**抗原:** Synthesized peptide derived from the Internal region of human Emp

**配方:**

**如何使用:** 加1ml超纯水重溶

**稳定性:** -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

**稀释液:** PBS (pH7.4) ， 1% BSA

**应用:** WB 1 ~ 5 μ g/ml.

**特异性:** Ubiquitous.
