Anti-Human EMR1 Polyclonal Antibody

多克隆抗体

产品货号: PA03742

第三版

描述: This gene encodes a protein that has a domain resembling seven transmembrane G protein-coupled hormone receptors (7TM receptors) at its C-terminus. The N-terminus of the encoded protein has six EGF-like modules, separated from the transmembrane segments by a serine/threonine-rich domain, a feature reminiscent of mucin-like, single-span, integral membrane glycoproteins with adhesive properties. Multiple alternatively spliced transcript variants encoding different isoforms have been found for this gene. ADGRE1 (Adhesion G Protein-Coupled Receptor E1) is a Protein Coding gene. Among its related pathways are Presynaptic function of Kainate receptors and Peptide ligand-binding receptors. GO annotations related to this gene include G-protein coupled receptor activity and transmembrane signaling receptor activity. An important paralog of this gene is ADGRE2.

抗原: Synthesized peptide derived from the C-terminal region of human EMR1

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μ g/ml.

特异性: Expression is restricted to eosinophils.
