Anti-Human/Mouse/Rat EPN2 Polyclonal Antibody

多克隆抗体

产品货号: PA03808

第三版

**描述:** This gene encodes a protein which interacts with clathrin and adaptor-related protein complex 2, alpha 1 subunit. The protein is found in a brain-derived clathrin-coated vesicle fraction and localizes to the peri-Golgi region and the cell periphery. The protein is thought to be involved in clathrin-mediated endocytosis. Alternate splicing of this gene results in multiple transcript variants encoding different isoforms. EPN2 (Epsin 2) is a Protein Coding gene. Among its related pathways are Sertoli-Sertoli Cell Junction Dynamics and Notch signaling pathway (KEGG). GO annotations related to this gene include lipid binding and phospholipid binding. An important paralog of this gene is EPN1.

**抗原:** Synthesized peptide derived from the Internal region of human Epsin 2

**配方:**

**如何使用:** 加1ml超纯水重溶

**稳定性:** -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

**稀释液:** PBS (pH7.4) , 1% BSA

**应用:** WB 1 ~ 5  $\mu$ g/ml.

**特异性:** Highest expression is found in brain. Detected at lower levels in lung and liver.
