Anti-Human/Mouse/Rat CACNG4 Polyclonal Antibody

多克隆抗体

产品货号: PA03903

第三版

描述:The protein encoded by this gene is a type I transmembrane AMPA receptor regulatory protein (TARP). TARPs regulate both trafficking and channel gating of the AMPA receptors. This gene is part of a functionally diverse eight-member protein subfamily of the PMP-22/EMP/MP20 family and is located in a cluster with two family members, a type II TARP and a calcium channel gamma subunit. CACNG4 (Calcium Voltage-Gated Channel Auxiliary Subunit Gamma 4) is a Protein Coding gene. Among its related pathways are CCR5 Pathway in Macrophages and PEDF Induced Signaling. GO annotations related to this gene include voltage-gated calcium channel activity. An important paralog of this gene is CACNG8.
