Anti-Human/Mouse JUN Polyclonal Antibody

多克隆抗体

产品货号: PA03921

第三版

描述: This gene is the putative transforming gene of avian sarcoma virus 17. It encodes a protein which is highly similar to the viral protein, and which interacts directly with specific target DNA sequences to regulate gene expression. This gene is intronless and is mapped to 1p32-p31, a chromosomal region involved in both translocations and deletions in human malignancies. JUN (Jun Proto-Oncogene, AP-1 Transcription Factor Subunit) is a Protein Coding gene. Diseases associated with JUN include Sarcoma and Esophageal Adenosquamous Carcinoma. Among its related pathways are ICos-ICosL Pathway in T-Helper Cell and CCR5 Pathway in Macrophages. GO annotations related to this gene include poly(A) RNA binding and sequence-specific DNA binding. An important paralog of this gene is JUND.

抗原: Recombinant Protein

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μ g/ml.

特异性:
