Anti-Human/Mouse/Rat CAV3.3 Polyclonal Antibody

多克隆抗体

产品货号: PA03941

第三版

描述: This gene encodes the pore-forming alpha subunit of a voltage gated calcium channel. The encoded protein is a member of a subfamily of calcium channels referred to as is a low voltage-activated, T-type, calcium channel. The channel encoded by this protein is characterized by a slower activation and inactivation compared to other T-type calcium channels. This protein may be involved in calcium signaling in neurons. Alternate splicing results in multiple transcript variants. CACNA1I (Calcium Voltage-Gated Channel Subunit Alpha1 I) is a Protein Coding gene. Diseases associated with CACNA1I include Childhood Absence Epilepsy. Among its related pathways are CCR5 Pathway in Macrophages and PEDF Induced Signaling. GO annotations related to this gene include ion channel activity and low voltage-gated calcium channel activity. An important paralog of this gene is CACNA1H.

抗原: Synthetic Peptide

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μ g/ml.

特异性: Brain specific.
