Anti-Human/Mouse/Rat FYN Polyclonal Antibody

多克隆抗体

产品货号: PA04104

第三版

描述: Tyrosine-protein kinase implicated in the control of cell growth. Plays a role in the regulation of intracellular calcium levels, with isoform 2 showing the greater ability to mobilize cytoplasmic calcium in comparison to isoform 1. Required in brain development and mature brain function with important roles in the regulation of axon growth, axon guidance, and neurite extension. Blocks axon outgrowth and attraction induced by NTN1 by phosphorylating its receptor DDC. Phosphorylates RUNX3.

抗原: Synthesized peptide derived from human Fyn around the non-phosphorylation site of Tyr530.

配方:
