Anti-Human/Rat Galectin 1 Polyclonal Antibody

多克隆抗体

产品货号: PA04123

第三版

描述:The galectins are a family of beta-galactoside-binding proteins implicated in modulating cell-cell and cell-matrix interactions. This gene product may act as an autocrine negative growth factor that regulates cell proliferation. May regulate apoptosis, cell proliferation and cell differentiation. Binds beta-galactoside and a wide array of complex carbohydrates. Inhibits CD45 protein phosphatase activity and therefore the dephosphorylation of Lyn kinase.

抗原:Synthesized peptide derived from the Internal region of human Galectin-1
