Anti-Human/Mouse GCN5 Polyclonal Antibody

多克隆抗体

产品货号: PA04155

第三版

描述:KAT2A, or GCN5, is a histone acetyltransferase (HAT) that functions primarily as a transcriptional activator. It also functions as a repressor of NF-kappa-B (see MIM 164011) by promoting ubiquitination of the NF-kappa-B subunit RELA (MIM 164014) in a HAT-independent manner.KAT2A (Lysine Acetyltransferase 2A) is a Protein Coding gene. Diseases associated with KAT2A include Hiv-1. Among its related pathways are Signaling by NOTCH1 and Validated targets of C-MYC transcriptional activation. GO annotations related to this gene include chromatin binding and transcription coactivator activity. An important paralog of this gene is KAT2B.

抗原:Synthesized peptide derived from the C-terminal region of human GCN5

配方:

如何使用:加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液:PBS (pH7.4) ， 1% BSA

应用:WB 1 ~ 5 μ g/ml.

特异性:Expressed in all tissues tested, with most abundant expression in ovary.
