Anti-Human/Mouse/Rat p21 Polyclonal Antibody

多克隆抗体

产品货号: PA04227

第三版

描述: May be the important intermediate by which p53/TP53 mediates its role as an inhibitor of cellular proliferation in response to DNA damage. Binds to and inhibits cyclin-dependent kinase activity, preventing phosphorylation of critical cyclin-dependent kinase substrates and blocking cell cycle progression. Functions in the nuclear localization and assembly of cyclin D-CDK4 complex and promotes its kinase activity towards RB1. At higher stoichiometric ratios, inhibits the kinase activity of the cyclin D-CDK4 complex.

抗原: Synthesized peptide derived from human p21 around the non-phosphorylation site of T145.
