Anti-Human PENK Polyclonal Antibody

多克隆抗体

产品货号: PA04550

第三版

描述: PENK (Proenkephalin) is a Protein Coding gene. Diseases associated with PENK include Cannabis Dependence and Radiculopathy. Among its related pathways are GPCR Pathway and Peptide ligand-binding receptors. GO annotations related to this gene include neuropeptide hormone activity and opioid peptide activity. An important paralog of this gene is PDYN. This gene encodes a preproprotein that is proteolytically processed to generate multiple protein products. These products include the pentapeptide opioids Met-enkephalin and Leu-enkephalin, which are stored in synaptic vesicles, then released into the synapse where they bind to mu- and delta-opioid receptors to modulate the perception of pain. Other non-opioid cleavage products may function in distinct biological activities.

抗原: Synthetic peptide from human protein

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μg/ml.

特异性:
